

50 years have passed

50 years have passed...

2011 was the jubilee year of KGHM Polska Miedź S.A. a time for summation and the remembrance of events of particular importance in the rich history of Polish Copper.

A half-century of work and effort by generations of people who built from scratch one of the world's largest miners and refiners of copper ore – KGHM Polska Miedź S.A.

Today, Polish Copper is more valuable than gold – for the people of the Copper Belt and Lower Silesia, and for Poland and its citizens.

Thanks to its position in the local and national economy, not to mention its position amongst the leading global producers of copper and silver as well as the role it serves in charitable and social activities.
